Experience

LLM Engineer (AI Data & Agent Training) | Turing Link **Sep 2025 – Present**

- Build **structured training datasets** for **LLMs, VLMs and Computer-Use Agents (CUAs)** through annotation workflows covering data collection, labelling and preparation.
- Generate **multimodal interaction data** from desktop and web environments to train and evaluate AI models.
- Perform **data quality assurance and validation** to maintain dataset accuracy, consistency and compliance standards.
- Support **AI-driven automation**, interface navigation and multimodal reasoning with clean, model-ready data.

Backend Developer Intern | UNQUE Cloudbook Pvt. Ltd. **Jul 2025 – Aug 2025**

- Developed backend services and **RESTful APIs** for a salon appointment and scheduling platform using **Node.js, Express.js and MongoDB**.
- Designed **scalable database models** and business logic to support booking and customer management workflows.
- Optimized **API performance**, improving system reliability and scalability.

Software Development Intern | Radius Synergies International Pvt. Ltd. **Feb 2025 – Jun 2025**

- Developed scalable **backend APIs** and optimized **MongoDB queries** to improve system performance.
- Contributed to a **modular backend architecture** designed for maintainability.
- Implemented **automated testing workflows** to ensure software quality and reliability.

Technical Skills

Languages	: Python, SQL, Java, C, C++, JavaScript	**Databases**	: SQL, MongoDB, NoSQL, Mongoose
Data Engineering	: Apache Spark, PySpark, Databricks, ETL/ELT Pipelines, Medallion Architecture, Parquet	**AI Data**	: LLM/VLM Datasets, Annotation, Data QA
Data Science	: Pandas, NumPy, EDA, Machine Learning Fundamentals	**Azure & BI**	: Azure Data Factory, ADLS, Azure SQL Database, Azure Databricks, Power BI
Back-end	: Node.js, Express.js, REST APIs, JWT	**Tools / Deploy**	: Git, GitHub, Jupyter Notebook, Linux
		Core CS	: DSA, OOPs, Operating Systems

Education

■ **Pranveer Singh Institute of Technology** Nov 2021 – June 2025
Bachelor of Technology – Computer Science (AI&ML) *CGPA : 8.15 / 10*

Projects

• **Retail Data Engineering Pipeline on Azure**
Technologies: Azure Data Factory, ADLS Gen2, Azure SQL Database, Azure Databricks, PySpark, Power BI

- Designed and built an **end-to-end data engineering pipeline** on Azure for a retail use case, using the **Medallion Architecture** to turn raw data from multiple sources into analytics-ready datasets.
- Orchestrated ingestion with **Azure Data Factory**, using copy activities to load transactional, product and store data from **Azure SQL Database** and customer data from a **REST API (JSON)** into **ADLS**.
- Cleaned and transformed data in **Azure Databricks with PySpark**, handling null values and duplicates and joining the sources into a single **Silver-layer** dataset.
- Built **Gold-layer aggregations** for business metrics such as total sales, quantity sold and transaction counts by store, product and month.
- Developed an interactive **Power BI dashboard** with KPI cards, month-over-month sales trends and store and product-category breakdowns to support business decisions.

• **Appointment Management System** | GitHub
Technologies: Node.js, Express.js, MongoDB, Mongoose, JWT

- Built a **role-based appointment system** with booking, scheduling and cancellation, backed by **RESTful APIs** and **MongoDB** data models.
- Designed **time-slot validation logic** to prevent scheduling conflicts and optimize resource allocation.
- Implemented **JWT-based authentication and authorization** for multiple user roles.

• **BlogList** | GitHub

Technologies: Node.js, Express.js, MongoDB, JWT, bcrypt

➢ Developed a blogging platform backend with **full CRUD operations** and user management.

➢ Secured the platform with **JWT authentication, bcrypt password hashing** and protected routes, with robust **input validation** and error handling.

Achievements

➢ Contributed to **training datasets for Computer-Use Agents (CUA)** and multimodal AI systems through large-scale workflow annotation projects (Turing, 2025).

➢ Scored **100/100 in Computer Science, Operating Systems and Computer Networks** in the SHL/AMCAT assessment.

➢ Certified English proficiency at **CEFR C1 level**.
